

## The Islamic Republic *Of Britain* In Iran.

### Britain Gives America The 2 Finger Salute On Iran

Britain will not take part in any attack on Iran, that's the message from Loony Blair & Co apparently, according to [this article](#), from The News International, Pakistan:

Britain has told the United States that it will not take part in any armed action against Iran's nuclear sites, according to diplomatic sources in London. The British Prime Monster Loony Blair is seeking to distance himself from America's belligerent rhetoric towards Iran.

The concern in Whitehall, however, is that the Bush administration, egged on by Israel and its powerful friends in the United States, risks developing an unstoppable momentum towards war, a war in which Britain clearly wants no part.

**MADE IN ENGLAND !!!**

British Company Costain Press signed huge LNG gas contract for Bid Boland in Khuzestan. The first phase is very small at 1.5 billion, but the interesting part of it is that they started the work before the deal was actually signed. This means that they have complete control of the situation and therefore can act with supreme confidence. Much of the engineering work for NIOC is given to British Shell . No question, the perfidious Albion is re-establishing itself in Khuzestan.
